### The Problem

Many facility floors take a lot of abuse from high traffic and industrial use. While others have special needs in certain medical and pharmaceutical environments. If the correct process and materials are not used the results could be catastrophic. There is such a vast amount of product on the market that it's difficult for facilities to determine which product is the best fit.

### The BMI Solution

BMI has been in the coating business for nearly 40 years and is highly skilled at creating custom solutions for our customers. Our trained professionals are eager to work through the problems that are plaguing your floor and match your needs with the proper solution. Whether you need non-skid slip resistant, anti-bacterial-microbial, thermal shock resistant, abrasion/ impact-resistant, chemical/solvent resistant, and/or moisture and vapor resistant, BMI has the right mix of products and expert installation to ensure a result that is attractive, functional and durable.
